AKADEMI

OFFICIAL SYSTEM SPECIFICATION

COMMUNITY REPLICATION & BRAND BLUEPRINT

Skool-Style Community Architecture & Brand Guide

A complete technical guide to replicate the Akademi multi-tab community space, modular classroom, gamified leaderboard, live masterclasses, and verified brand identity.

Primary Palette
Forest Emerald (#0F5338) & Gold (#F59E0B)

Architecture
7-Tab Skool Model + WebRTC SFU

Monetization
Paystack Subscriptions & Tokens (NGN)

Version 2.4.0 • October 2026

Document Table of Contents

PART 1: BRAND IDENTITY & DESIGN SYSTEM

1.1 Visual Philosophy & Principles

1.2 Complete Color Palette & Token Swatches

1.3 Typography Scale & Hierarchy

1.4 UI Component Specs (Buttons, Badges, Cards)

PART 2: COMMUNITY TECHNICAL ARCHITECTURE

2.1 System Overview & 7-Tab Layout

2.2 Database Schema & Entity Relationships

2.3 REST Endpoints & WebSocket Events

2.4 Step-by-Step Replication Roadmap

Part 1: Brand Identity & Design System

The Akademi visual language balances **academic prestige, mentorship trust, and gamified achievement**. It is optimized for clarity across both high-end desktop monitors and mobile devices on Nigerian cellular networks.

1.1 Primary & Accent Color Palette

Forest Emerald (Core)
`#0F5338`
Primary brand color, headers, primary buttons, active tabs.

Dark Forest Emerald
`#0A3D29`
Navbar background, active hover states, deep borders.

Radiant Gold (Core)
`#F59E0B`
High-conversion CTA buttons, reward tokens, streak badges.

Vibrant Emerald
`#10B981`
Live indicators, verified badges, success state alerts.

Slate 950
`#020617`
Primary page headings, highest-emphasis typography.

Slate 500
`#64748B`
Timestamps, metadata subtitles, inactive icons.

Soft Emerald 100
`#D1FAE5`
Verified tutor badge background, free tier pills.

Amber Light 100
`#FEF3C7`
Paid membership tag, token counter backgrounds.

1.2 Typography Hierarchy

ROLE	SIZE	WEIGHT	TRACKING	APPLICATION
Display Title	32px - 40px	Bold (800)	-0.025em	Landing page headlines, Hero banners
Section Heading (H1)	24px - 28px	Bold (700)	-0.02em	Community titles, Dashboard views
Card Title (H2)	18px - 20px	Semi-Bold (600)	-0.015em	Module headers, Event modal titles
Post / Item Title (H3)	15px - 16px	Semi-Bold (600)	-0.01em	Feed discussion post titles, Lesson items
Body Standard	13.5px - 14px	Regular (400)	normal	Post content, comments, descriptions

ROLE	SIZE	WEIGHT	TRACKING	APPLICATION
Caption / Metadata	11px - 12px	Medium (500)	normal	Timestamps, author subtitles, prices
Badge / Tag Pill	10.5px	Bold (700)	0.05em (caps)	Categories, "VERIFIED", "PAID NGN 4,500/MO"

1.3 UI Component Styling Guide

Button Specs

Primary Brand Action (#0F5338)

High-Conversion CTA (#F59E0B)

Secondary Outlined Button

Badge & Indicator Pills

✓ Verified Tutor

🔒 Paid • ₦4,500/mo

• Free Community

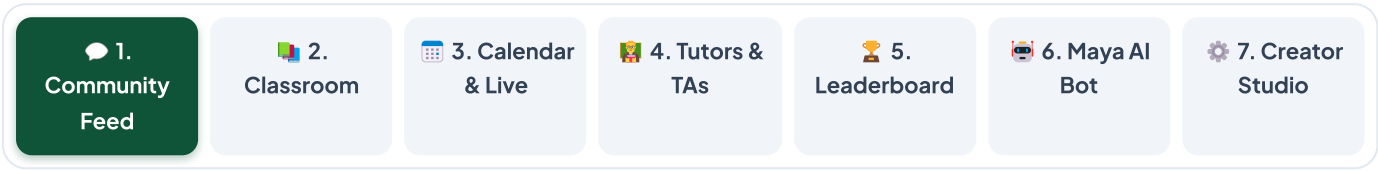

Level 4 Scholar

• LIVE NOW

Part 2: Community Technical Architecture

The Akademi Community subsystem elevates tutoring from isolated video calls into an **active, sticky learning mastermind**. It combines discussions, course lessons, calendar events, resident tutors, and AI coaching.

2.1 Skool-Style 7-Tab Navigation Architecture

TAB	PURPOSE	KEY SUB-FEATURES & COMPONENTS
1. Community	Peer Discussion & Social Feed	Rich post composer, tags (`#General` , `#Q&A`), upvotes, threaded comments, pinned announcements, author level badges.
2. Classroom	Structured Modular Curriculum	Accordion modules, video lessons with duration badges, PDF/doc worksheets, quizzes, progress checkmarks, completion XP.
3. Events	Live Masterclasses & Calendar	Upcoming live sessions, 1-click meeting join (`/classroom/meeting-...`), Google Calendar 2-way sync, countdown timers.
4. Experts	Resident Tutors & Mentors	Directory of verified instructors, hourly rates in Naira (`₦6,500/hr`), star ratings, 1:1 booking CTA, direct messaging.
5. Leaderboard	Gamification & Token Economy	7-day, 30-day, and all-time student rankings, levels (Novice to Grandmaster), daily login streaks, token conversion to free tutoring.
6. Maya AI	24/7 Contextual Study Bot	Subject-specific AI tutor answering curriculum doubts, providing practice questions, and explaining past exams.
7. Studio	Creator & Admin Governance	Subscription revenue tracking (MRR in NGN), member approval/banning, lesson creator modal, community configuration.

2.2 Database Schema (SQL Blueprint)

```
-- Core Communities
CREATE TABLE communities (
    id VARCHAR(64) PRIMARY KEY,
    name VARCHAR(255) NOT NULL,
    slug VARCHAR(255) UNIQUE NOT NULL,
    tagline VARCHAR(255),
    description TEXT,
    category VARCHAR(100) NOT NULL,
```

```
    community_type VARCHAR(50) DEFAULT 'Tutor Masterclass',
    access_type VARCHAR(20) DEFAULT 'paid', -- 'free' | 'paid'
    monthly_price DECIMAL(10, 2) DEFAULT 0.00,
    currency VARCHAR(10) DEFAULT 'NGN',
    cover_image_url TEXT,
    avatar_url TEXT,
    creator_id VARCHAR(64) NOT NULL REFERENCES users(id),
    is_verified BOOLEAN DEFAULT TRUE,
    created_at TIMESTAMP WITH TIME ZONE DEFAULT CURRENT_TIMESTAMP
);

-- Discussion Feed Posts
CREATE TABLE community_posts (
    id VARCHAR(64) PRIMARY KEY,
    community_id VARCHAR(64) NOT NULL REFERENCES communities(id) ON DELETE CASCADE,
    author_id VARCHAR(64) NOT NULL REFERENCES users(id),
    title VARCHAR(255) NOT NULL,
    content TEXT NOT NULL,
    category_tag VARCHAR(50) DEFAULT '#General',
    is_pinned BOOLEAN DEFAULT FALSE,
    upvotes_count INT DEFAULT 0,
    created_at TIMESTAMP WITH TIME ZONE DEFAULT CURRENT_TIMESTAMP
);

-- Course Curriculum Modules & Lessons
CREATE TABLE community_modules (
    id VARCHAR(64) PRIMARY KEY,
    community_id VARCHAR(64) NOT NULL REFERENCES communities(id) ON DELETE CASCADE,
    title VARCHAR(255) NOT NULL,
    order_index INT NOT NULL DEFAULT 0
);

CREATE TABLE community_lessons (
    id VARCHAR(64) PRIMARY KEY,
    module_id VARCHAR(64) NOT NULL REFERENCES community_modules(id) ON DELETE CASCADE,
    title VARCHAR(255) NOT NULL,
    lesson_type VARCHAR(30) DEFAULT 'video', -- 'video' | 'doc' | 'quiz'
    duration_label VARCHAR(50),
    video_url TEXT,
    order_index INT NOT NULL DEFAULT 0
);
```

2.3 Replication Roadmap & Implementation Plan

Step 1: Set Up Backend Models & REST Routes

Create database tables for `communities`, `community_members`, `community_posts`, `community_modules`, and `community_events`. Expose REST endpoints for list, get by slug/id, post creation, upvote toggle, and lesson progress.

Step 2: Build the Hub / Discovery View (`Communities.tsx`)

Implement search, category tabs (Data & Tech, Math & Sciences, Languages), free/paid filter pills, and community cards with member counts and prices in Naira (`₦4,500/mo`). Include a "Create New Community" modal for tutors and admins.

Step 3: Construct the 7-Tab Space (`CommunityDetail.tsx`)

Assemble the hero cover banner, sticky tab bar, and dynamic active view renderer. Ensure discussions allow markdown, comments, and upvotes with optimistic UI updates.

Step 4: Integrate Paystack Subscription Flow

For paid communities, initialize Paystack transaction with `transaction_type = 'community_membership_subscription'`. Upon verification via webhook, grant member access for 30 days.

Step 5: Connect Live Events to WebRTC Classroom

When an event is scheduled, attach a `meeting_room_id`. Wire the "Join Live Room" button to launch the full-screen video classroom at `/classroom/:sessionId` with lobby countdown gates.

Step 6: Gamification & Token-to-Tutoring Conversion

Award 15 XP for lesson completions and 10 XP for discussions. Enable learners to convert 100 accumulated tokens into 30 minutes of free 1-on-1 tutoring sessions with verified platform tutors.
